

I used Homebrew to install the 64-bit version of Pajek.

1. First, you need to install it using your Terminal by running this command:

```
/bin/bash -c "$(curl -fsSL https://raw.githubusercontent.com/Homebrew/install/HEAD/install.sh)"
```

2. Then, you need to install Cask by running:

```
brew install caskroom/cask/brew-cask
```

3. Now, you can install wine:

```
brew install wine-stable
```

4. Finally, you can run Pajek executable, which you can download from the software website

```
wine path/to/Pajek.exe
```
